EDUCATION

Vellore Institute of Technology

2022 – 2027 (Expected)

Integrated M.Tech in Artificial Intelligence

CGPA: 8.49

- **Relevant Coursework:** Machine Learning, Deep Learning, Natural Language Processing, Computer Vision, Data Structures & Algorithms, Probability & Statistics, Linear Algebra, DBMS, Big Data Analytics

SKILLS

Programming Languages: Python, SQL

Machine Learning: Supervised Learning, Model Evaluation (F1, ROC-AUC), Feature Engineering, Classification, NLP, SentenceTransformers

AI LLM Systems: Large Language Models (LLMs), Retrieval-Augmented Generation (RAG), LangChain, LangGraph (basic), Embedding Models, Vector Databases (FAISS)

Data Analytics: Pandas, NumPy, Matplotlib, Seaborn, PowerBI

MLOps & Deployment: Docker, Streamlit, Model Deployment, Git, GitHub

INTERNSHIPS

Data Analytics Intern – S. S. Heavy Equipments Pvt. Ltd.

Nov 2025 – Dec 2025

Pune, India

- Analyzed over 2 years of sales and revenue data to identify performance trends and support strategic planning decisions.
- Built structured analytical reports improving visibility into revenue streams and operational efficiency.
- Performed trend and variance analysis to evaluate revenue fluctuations across product categories.

PROJECTS

TrueContext – Generative AI Document Assistant 🐙 | 🌐

Jan 2026

Python, LangChain, RAG, LLM, Streamlit, Docker

- Built an end-to-end Generative AI assistant using RAG architecture, enabling natural language querying over 1,000+ document chunks.
- Implemented embedding-based vector retrieval to improve response context relevance by ~35%, demonstrating applied LLM integration.
- Containerized and deployed the application using Docker, achieving production-ready MLOps deployment and reducing environment setup time by ~70%.

Stress Monitoring System using Physiological Signals 🐙

Apr 2025

Python, Scikit-learn, SVM, KNN, Fuzzy Logic

- Developed an end-to-end predictive modeling pipeline for multi-class stress detection, achieving 92.8% accuracy on physiological sensor data.
- Implemented fuzzy logic rules to handle sensor uncertainty and improve decision boundaries, contributing to real-world inference robustness.
- Optimized feature selection pipeline and evaluated model deployment feasibility for real-time inference use cases.

ExpenX – ML-Powered Expense Intelligence System 🐙

Ongoing

Python, SentenceTransformers (all-MiniLM-L6-v2), PyTorch, Pandas, Matplotlib, Plotly, Seaborn

- Architected an end-to-end NLP pipeline for automated expense categorization from noisy, real-world expense description.
- Fine-tuned a SentenceTransformer-based predictive model, improving macro F1-score over a TF-IDF + Logistic Regression baseline.
- Developed interactive dashboards to surface data-driven insights on spending trends, recurring expenses, and anomaly patterns.

LEADERSHIP & EXTRACURRICULAR

Resource Department Lead – Insight Club, VIT

Sep 2024 – Sep 2025

- Led a 10-member team to curate university publications, improving content turnaround time by ~30%.

Media Team Lead – Marathi Club, VIT

Mar 2024 – Sep 2025

- Managed digital strategy and analytics, driving a 40% increase in audience engagement metrics.
